THE PROBLEM

The medicine existed. Nobody knew where to find it.

♥ IN MEMORY OF SUSAN OBOH

**Shot in 2022. Needed Tranexamic
Acid Injection.**

Susan died.

Weeks later, I found it sitting on a shelf in a pharmacy nearby.

THE PROBLEM

“
♥ JOY AFIA

**Asthma attack in an Uber. Visited 4
pharmacies.
Turned away at every single one.**

”
She is now on our team, building the solution she desperately needed.

THE PROBLEM

STUDY FINDINGS

Pharmacist Community WhatsApp Group
1,000+ members • Active daily

180

Daily urgent medicine requests

"Who has Augmentin 625mg?"

"Need Ipratropium nebules urgently 🙏 "

"Anyone have Tranexamic acid??"

Existing e-medicine platforms don't work **at the pharmacy counter.**

Patients ask their pharmacist FIRST (not an app).

Pharmacists ask their WhatsApp group FIRST (apps are a last resort).

THE SOLUTION

PharmaStackX Terminal

Real-time inventory discovery on the pharmacist's desktop.

An AI desktop agent powered by a **shared pharmacy database**.

Search any unavailable medicine and see who has it in 3 seconds.

First-line solution at the point of failure (before WhatsApp or e-medicine apps).

WHY NOW?

Why PharmaStackX is inevitable **today.**

70%+ Pharmacies Digitized

Most pharmacies already use desktop software; creating ready digital inventory at the counter.

180 Daily Requests Tracked

Pharmacists actively share stock on WhatsApp, but manual chats are slow and uncertain.

AI-Powered Local Sync

The evolution of AI enables instant POS sync via direct SQL drivers, network interception, and computer vision.

TECHNOLOGY PROOF

Zero-permission sync is a **\$10B+ proven blueprint.**

Plaid (\$13B+)

FINTECH DATA AGGREGATION

Connected thousands of small banks with **zero open APIs** via client-side scraping & memory hooks.

Deliverect (\$1B+)

RESTAURANT POS INTEGRATION

Connected un-cooperative restaurant POS systems live using **virtual printer spooler bridges**.

Change (\$13B Acq)

HEALTHCARE BILLING DRIVERS

Scraped clinical billing codes directly from hospital EMR print streams without vendor permission.

⚡ **PharmaStackX applies this exact OS Print Spooler & Client-Side Driver architecture to retail pharmacy counters globally.**

Market Opportunity

TAM

\$1.5B+ Total Annual Drug Spend

100,000+ vendors nationwide

SAM
